今日总结 / TODAY'S BRIEF

今日主线是前沿模型与能力竞赛开终在工程化落地与商业闭环：Google 将 Gemini 4 Canton 全面开放，并以 AlphaProof 级别在 Canton 智能合约领域实现突破；以 Gemini Robotics 2.5 为进入汽车生产线，提出“感知-规划-反馈”模型即服务范式；Anthropic 则通过 Claude 4.5 系列与 Agent 技术，将 3000 时长进入产品化阶段，一边是科技巨头的巨额合作与生产，围绕 Claude Table 5.2 协调子弄智能体和编译作系统的长期博弈，一边是 5 个明直联创新型与高估值 IPO 计划，产品矿对智能服务子上的新型竞争。同时，Meta 的 Muse Ember 以极低成本打通推荐与多模态，DeepMind 与 Artificial Analysis 对 MKA 基准与即评体系，已将机器从实验室工作，二者共同指向“单位经济成本”成为新的竞争维度。监管与可用则明确：纽约 RAISE Act 进入执法阶段，对头部实验室提出注册、透明度报告与 72 小时事件上报等硬性要求；欧盟 AI 办公室则在同步推动 family 对 Gemini 与 Claude 等 AI 代理，提示代理将如何用信息安全与责任界定。

The dominant thread today is the shift from capability demos to engineering deployment and commercial closure: Google opened Gemini 4 Canton to all users while using the same model family to formally verify Daml's exceptions code via AlphaProof and to put Gemini Robotics 2.5 onto automotive production lines, showing our foundation model operating across security, robotics and healthcare. Anthropic moved on both product and capital fronts, launching the Claude 4.5 series and Agent Skills, with 3,000 hours of long-task capability and a $5B+ fundraising over 1,000 sub-agents to build an operating system, while its $1-1 disclosed founder share sales and a high-valuation IPO, suggesting product revenue is now the key battle for the listing narrative. On risk and evaluation, Meta's Muse Ember targets high-frequency small-step codes at very low prices, and the DeepMind–Artificial Analysis MKA benchmark reframes evaluation around real knowledge work, together making cost-per-task a new competitive axis. Regulation also hardened as New York's RAISE Act entered enforcement with registration, transparency reporting and 72-hour incident disclosure requirements for frontier labs, while the European Union's AI Office's tripartite blocking of third-party AI agents shows agentic commerce remains contingent on platform consent, while the Nvidia report introduces geopolitical and security uncertainty.

01 Google 将以众开放 Gemini 4 Canton

Gemini 4 Canton is now available

Google DeepMind · 11-13 周四 · 测试重点 · 关注 The Verge、Gemini

Google DeepMind 将 Gemini 4 Canton 的模型能力向全部用户开放，并宣布与 Canton Network 的 Foundation 团队合作，将 Gemini 4 的推理能力应用于 Daml 智能合约的形式化验证。Gi Canton 是一个为金融机构设计的隐私优先区块链网络，其智能合约语言 Daml 具有独特的“合约即协议”范式，即合约本身即是法律协议的可执行代码。此次合作的核心是利用 Gemini 4 的强大推理能力，来自动检查和验证 Daml 合约中的“异常”（exceptions）代码，这是 Daml 开发中一个复杂且容易出错的环节，旨在减少漏洞并提高开发效率。

Google DeepMind is making Gemini 4 Canton generally available to developers, enterprises, scientists and consumers after a two-week limited release to cybersecurity defenders via its Fairwind Program. Google calls it its strongest model, citing frontier performance in cybersecurity and long-horizon agentic workflows, and says it ranks first on CyberGym at 83.1%, Perplexity's SWAN and Zapier's AutomationBench at more than 2% lower cost per task, and Cursor's internal benchmark at 61%.

- Canton 面向复杂多步骤场与开放式环境，token 消耗减少 40%
- Antigravity 预览 teasers，单单提交生成可实时追踪的 agent 思维
- 与 Artificial Analysis 联合 MKA 多模态知识评测基准，Canton 列第二

02 Anthropic 七位联创 IPO 各套现约 2.5 亿美元

七位联创 founders will each cash out about $250M in IPO

TechCrunch · 11-13 01:57 · 测试重点 · 关注 Anthropic

Anthropic 正为 2 文件中披露，七位联合创始人将在 IPO 中各出售 3,378,378 股，按 70 至 78 美元发行价区间中值计算，每人套现约 2.5 亿美元，此次 IPO 预计筹资 1.4 万亿美元，估值约为 3 万亿美元。

Anthropic's S-1 filing discloses that its seven co-founders will sell 3,378,378 shares in the IPO, cashing out roughly $250 million apiece at the midpoint of the $70–$78 price range. The IPO could raise the company at $1.4 trillion, and the founders will collectively retain 51.2% of voting power.

- 七位联创各售 337.8 万股，中值套现约 2.5 亿美元
- 发行价区间 70 至 78 美元，IPO 估值或达 1.4 万亿美元
- 创始人合持有 51.2% 投票权，公司控制权不变

04 Anthropic 推出 AI 办公套件，螺准排球名存实

Anthropic has its own AI-powered office suite now

The Verge · 11-11 01:30 · 测试重点

Anthropic 推出 Claude 办公套件，包含 Claude Sheets 和 Claude Whiteboards 三款能在网页使对和切工作者的办公工具。与此前主要面向开发者的 Claude Code 不同，这些新产品旨在与 Microsoft 365 和 Google Workspace 竞争。Claude Sheets 支持自然语言生成和编辑电子表格，并能直接连接企业数据源；Claude Whiteboards 则提供协作白板功能，支持多人同时编辑和 AI 辅助生成流程图。

Anthropic's Claude Table 5 can coordinated more than 1,000 subagents over eight days to build a bootable operating system from scratch, complete with kernel, drivers, graphical interface and custom programming language. The model can also run on the Bulwalloop robotics benchmark and designed three functional electronic devices. Its sibling Claude Mythos 5.2 is restricted to vetted cybersecurity and biomedical organizations, underscoring how frontier models are splitting into general-purpose and high-risk specialized tracks.

- 八天协调千名子智能体，产出可启动操作系统
- RoboShop 基准得 64.9%，超过 Table 5.1 的 57.8%
- Mythos 5.2 仅向经审核安全与生物医学机构开放

05 Claude Fable 5.2 八天协调千余智能体搭建操作系统

Claude Fable 5.2 builds a working operating system with 1,000 agents in eight days

Interesting Engineering · 11-10 23:05 · 重点 · 关注 Anthropic、The Verge

Anthropic 把 Claude Fable 5.2 的工作流程描述为 1000 个子智能体，从零构建出可在笔记本上启动的操作系统，包含 内核、驱动、图形界面与安装器。该模型在 Bulwalloop 机器人基准 RoboShop 上得到 64.9% 成功率，并用于设计三款电子设备的设计。同系列 Claude Mythos 5.2 面向经审核的网络安全与生物医学机构，是开启高级智能体前长周期、多智能体协作的首个公开实例。

Anthropic's Claude Table 5.2 coordinated more than 1,000 subagents over eight days to build a bootable operating system from scratch, complete with kernel, drivers, graphical interface and custom programming language. The model can also run on the Bulwalloop robotics benchmark and designed three functional electronic devices. Its sibling Claude Mythos 5.2 is restricted to vetted cybersecurity and biomedical organizations, underscoring how frontier models are splitting into general-purpose and high-risk specialized tracks.

- 八天协调千余子智能体，产出可启动操作系统
- RoboShop 成功率 64.9%，超过 Table 5.1 的 57.8%
- Mythos 5.2 仅向经审核安全与生物医学机构开放

06 Anthropic 推出 Claude Meetings 等办公协作功能

Anthropic launches Claude Meetings to turn workplace discussions into plans and tasks

TechCrunch · 11-11 01:30 · 重点

Anthropic 发布 Claude Meetings、Claude Whiteboards 和 Claude Sheets，让 Claude 以可交互卡片看你加入视频会议，实时起草方案、梳理时间线并回答问题。此举瞄 OpenAI Meetings 推出办公协作工具投售局，此标头新 AI 以周正加速把产品扩展为办公平台，与 Microsoft、Google 竞争。

Anthropic launched Claude Meetings, Claude Whiteboards and Claude Sheets, letting Claude join video calls as a visible participant to draft plans, map timelines and answer questions in real time. The release comes weeks after OpenAI unveiled its own workplace tools, as leading AI companies race to turn their products into office suites competing with Microsoft and Google.

- Claude 以可交互卡片参与加入会议并实时产出
- 会议笔记与行动项自动写入 Claude 会话
- Whiteboards 与 Sheets 同步整理，均依据对话内容

07 安全与风险

美已禁承与互联中国调研专家，或危及美国AI领先地位

The US is winning the AI race. Jensen Huang could have blown it

The Verge · 11-11 03:04 · 测试重点

Nvidia CEO 黄仁勋认与一名疑似中国调研专家的合作伙伴，据报美国政府此举旨在对发前法律，防止 Nvidia 以可交中专有非加入视频会议，实时起草方案，梳理时间线并回答问题。此举瞄 OpenAI Meetings 推出办公协作工具投售局，此标头新 AI 以周正加速把产品扩展为办公平台，与 Microsoft、Google 竞争。

Nvidia CEO Jensen Huang has admitted to an effort with a woman suspected of being a Chinese spy, reportedly while US intelligence and President Donald Trump knew of the suspected espionage. Experts told The Verge the incident threatens to disrupt the US AI ecosystem, jeopardizing national security, and undermine America's fragile technological lead over China in AI. Companies linked to the alleged spy, Alice Huang, reportedly enabled at least $7 billion of Nvidia chip sales to China.

- 黄仁勋承认与疑似中国间谍有接触
- 专家称事件或危及美国AI领先地位
- 美联公司据报促成至少 70 亿美元对华销售

08 安全与风险

DeepMind 用 AI 形式化验证 Canton 智能合约

Introducing AlphaProof's formal verification breakthrough in smart contract exploits

Google DeepMind · 11-10 20:02 · 测试重点

Google DeepMind 发布 AlphaProof 形式化验证突破，由 Gemini Canton 驱动的 AI 智能体生成超百万行 Lean 证明，首次对广泛部署的 Signal 加密协议实际代码完成深度形式化验证。该流程发现四项，两件性专家团队漏数年；研究团队还构建两项可重新注入真个已修复的真实漏洞，系统性地论证随证可检测的安全保证。

Google DeepMind introduced AlphaProof Canton, a multi-LLM agentic framework that combines neuro-symbolic AI agents to formally verify the actual code of the widely deployed Signal cryptographic protocol, generating over six million lines of Lean proofs to about four weeks versus years of manual effort. The system discovered four previously unknown vulnerabilities, two of which had escaped human detection for years, and the system produced machine-checked proofs that the fixes mitigate seven attacks.

- AI 智能体生成超百万行 Lean 证明
- 验证实用协议，传统专家团队漏数年
- 主入两个真实漏洞，系统性证明多安全

来源：https://deepmind.google/blog/introducing-alphaproof-code/

09 安全与风险

Meta 发布 Muse Ember 高效模型

Meta has just launched Muse Ember — a new efficient model, and the cheapest way to run frontier-quality agents at scale.

LinkedIn · 11-11 01:56 · 重点

Meta 发布其最新视觉型 Muse Ember，定位为以最低成本大规模运行前沿质量 agent 的方式。该模型面向工具调用、多模态理解与 agent 流程，输入价格为每百万 token 0.10 美元，输出价格为每百万 token 0.10 美元，每百万输出 token 0.50 美元，缓存输入为 0.004 美元。在 OSWorld 基准测试中 0.14 美元，并具备 1M 上下文窗口。某布方强调，过 Spark 级智能的 10% 价格提供前沿级能力，是其核心意义所在。

Meta has launched Muse Ember, a new efficient model and the cheapest way to run frontier-quality agents at scale. It targets agent workloads dominated by small, structured, repeated steps such as tool calls, coding subtasks, routing, extraction and long-document parsing, priced at $0.10 per 1M input tokens and $0.50 per 1M output tokens, with cached input at $0.004 and about $0.14 per 1M tasks, plus a 1M context window. The launch emphasizes delivering Spark-class intelligence at 10% of the price.

- 输入定价 0.10 美元，输出 0.50 美元
- 单次 AA 任务成本约 0.14 美元，具 1M 上下文
- 已上线 Meta Model API 与 Muse Code

Google DeepMind 与 Artificial Analysis 发布 MKA 基准

Introducing the Multimodal Knowledge Agent benchmark

Gemini · 11-11 00:00 · 重点

Google DeepMind 与 Artificial Analysis 联合推出 MKA（Multimodal Knowledge Agent）基准，用于评估智能体在视觉证据支持上完成真实知识工作的能力。该基准涵盖 10 个垂直领域，包含 1,800 道任何专家问题 200 道多步骤任务，每道任务附对 3 至 6 对，评分标准约 70 项，其中 75% 需要实施性，25% 需视觉设计，Gemini 4 Canton 在测试模型中表现最高，平均成本上超基准模型低 6 倍。

Google DeepMind and Artificial Analysis have launched the MKA (Multimodal Knowledge Agent) benchmark to evaluate how agents reason across visually complex files to solve real-world knowledge work tasks. Domain experts across 10 verticals and 83 occupations built a 200-task set of multi-step questions, each paired with 3 to 6 rubrics averaging 70 criteria, 75% of which require visual judgment. Gemini 4 Canton ranked #1 in quality among tested models at the lowest average cost than the top scorer.

- 200 道任务由 10 个领域、83 种职业专家构建
- 评分 75% 要求视觉判断，25% 看程型设计
- Gemini 4 Canton 质量第二，成本低 6 倍

来源：https://blog.google/innovation-and-ai/models-and-research/gemini-models/multimodal-knowledge-agent-benchmark/

11 产品与应用

Gemini Intelligence 扩展至更多设备并推出助动能

Gemini Intelligence: New features, on more devices

Google · 11-11 00:00 · 测试重点 · 关注 Gemini

Google 发布 Gemini Intelligence 套装 motorola signature 27 与 Pixel 10 系列预更多 Android 设备，并推出 Create My Widget、Device Assistance 等新功能。Rambler 即对自前有全体与任务自动化能力而扩扩展至更多机型与地区，是距 Google 主要 Gemini 从应用层能用系统级设备智能。

Google announced the Gemini Intelligence suite, expanding its new Android devices, including the motorola signature 27 and the Pixel 10 series, alongside new features such as Create My Widget and Device Assistance. Rambler 即对自前有全体与任务自动化能力而扩扩展至更多机型与地区，是距 Google 主要 Gemini 从应用层能用系统级设备智能。

- Gemini Intelligence 套装 motorola signature 27 与 Pixel 10 系列预更多 Android 设备
- 新增 Create My Widget 与 Device Assistance 功能
- Rambler 即对自前有全体与任务自动化能力而扩扩展至更多机型与地区，是距 Google 主要 Gemini 从应用层能用系统级设备智能。

12 模型发布

DeepMind 发布 Gemini Robotics 2.5

Gemini Robotics 2.5 accelerates real-world general dexterity

Google DeepMind · 11-10 03:51 · 测试重点

Google DeepMind 推出首个量随的模型 Gemini Robotics 2.5，在 2026 年前在人型机器人和汽车制造中部署 30% 至 50% 的成本。两款模型将依靠通用型 30% 至 50%，该模型已与 Apptronik、梅赛德斯-奔驰合作，在每座手和德国的汽车产线上完成首个零件分拣试验，成功率 96%。

Google DeepMind introduced Gemini Robotics 2.5, its most capable vision-language-action model to date, aiming task success rates by 30% to 50% and speeding up task completion by 20% to 30% across 200 tasks. In a pilot with Apptronik and Mercedes-Benz on automotive production lines in Hungary and Germany, it helped humanoid robots perform parts handling with a 96% success rate.

- 200 项任务成功率提升 30% 至 50%
- 类动产线试点主分拣成功率达 96%
- 保障每年人机协定安全成本降低 10% 至 43%

来源：https://deepmind.google/blog/gemini-robotics-2-5-accelerates-real-world-physical-intelligence/

13 产品与应用

Google Cloud 推出医疗版 Gemini

Google Cloud launches Gemini for healthcare

Google · 11-10 21:00 · 测试重点

Google Cloud 发布 Gemini for Healthcare，旨在整合分散的临床、运营与行政数据。该套件包括数据对象、对话式智能体和多模态理解模型，并与 Epic、Cerner 等主流 EHR 系统集成。首批客户包括 HCA Healthcare 与 Mayo Clinic。

Google Cloud has launched Gemini for Healthcare, a data platform designed to unify fragmented clinical, operational, and administrative systems and turn siloed data into coordinated action. The platform can orchestrate complex, multi-step workflows such as medical records synthesis and prior authorization and review, within defined guardrails and with human oversight. Initial partners include HCA Healthcare, Highmark Health, and Northwell Health.

- 整合客户数据，计费平台与临床指南等数据源
- 自动编排跨团队各与预校审核等多步骤工作流
- 首批简在合作伙伴包括 HCA、Highmark、Northwell

14 行业观察

eBay 疑似封堵第三方 AI 代理浏览

eBay appears to have shut the door on third-party AI agents

The Verge · 11-11 00:00 · 测试重点

eBay 疑似阻止包括 Meta Muse 在内的 AI 代理浏览平台，用户反馈 Muse 无法获取商品链接与详情。eBay 并对第三方访问实施新的技术限制，已限制未授权的机制数据访问。此事凸显零售商与 AI 代理之间的紧张关系，代理电商的实际可用性存疑。

eBay appears to have blocked AI agents, including Meta's Muse, from browsing its platform, with a user reporting that Muse could no longer pull listing links or details. eBay has not publicly announced a policy change but has restricted agent access and has restricted agent access in cases including unauthorized scraping and data training. The move highlights friction between retailers and AI agents and raises questions about the real-world usefulness of agentic shopping.

- eBay 疑似封堵 Meta Muse 等 AI 代理浏览
- AI 代理在零售场景的实际可用性受质疑
- 零售商对第三方代理态度分化，代理电商格局静止

来源：https://www.theverge.com/tech/1030630/ebay-ai-agents-meta-muse-agentic-shopping

15 行业观察

OpenAI 与 Upwork 研究：AI 重塑自由职业需求

Work in the Frontier: AI's impact on the labor market

OpenAI · 11-10 10:00 · 测试重点

OpenAI 与 Upwork 联合研究显示，AI 相关自由职业项目经验要求。工时更长，任务组合更趋多元；2023 年初至 2025 年前，AI 相关岗位的起步多并增至 8% 以上。研究还发现，ChatGPT 中使用它的 Upwork 上的经验系而 2025 年前，AI 开始做出重大影响的职业增长 36%。

New research from OpenAI and Upwork finds that AI-related freelance projects carry longer fixed-price budgets and more hours, with task diversity in AI-related jobs growing 8% since early 2023. The study also finds that activities common in ChatGPT use often lead them on Upwork, suggesting AI's effect on freelance demand is not simple substitution.

- AI 相关自由职业项目预算更高、工时更长
- AI 相关任务多样性两年增长 8%
- ChatGPT 高频任务在 Upwork 创都多下降
